

In order to help safeguard the health of our patients and staff please note the following:

We will be screening patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering our healthcare facilities. Please call to reschedule your existing appointment if any of the following conditions apply to you, a family member, or anyone that you have been in close contact with:

1. Have you traveled out of the country in last 3 weeks?
2. Have you been in contact with someone who has COVID 19 or was suspected of COVID 19?
3. Do you have an active fever?
4. Do you have an active cough?

Furthermore, please find below additional recommendations on how to stay healthy and stop the spread of germs:

- Wash your hands frequently with warm, soapy water for at least 20 seconds. If soap and water isn't available, use an alcohol-based hand sanitizer containing at least 60% alcohol.
- Cover your nose and mouth with tissues whenever you cough or sneeze and safely discard used tissues in the trash. If tissues are not available, sneeze into your sleeve or elbow.
- Avoid touching your eyes, nose, and mouth.
- Avoid shaking hands with others which can inadvertently spread germs.
- Clean and disinfect frequently touched surfaces or objects with disinfectant wipes or spray including cell phones, remote controls, workstations, desks/tables, and other commonly used items.
- Avoid close contact with other individuals who are sick or are experiencing other cold or flu-like symptoms.
- If you are feeling sick, please stay at home and seek medical care when necessary.

Thank you for your continued and dedicated support of Progressive Radiology. We want to thank all of the healthcare and government workers who are on the front line doing everything they can to contain this virus. I wish all of you good health during this difficult time.
